

BALLISTIC IMAGER

Achieve record-breaking data extraction speeds with forensic accuracy

Patented Technology

Offering forensic imaging speeds 8x faster than the industry average and the ability to get non-technical users fully operational with a 30-minute training session, our globally patented Ballistic Imager tool has become the trusted choice for creating physical images fast.

- Forensically secure data from hard disks in minutes
- Deploy on computers and laptops running Windows, Mac or Linux
- Swiftly secure data from servers
- Achieve blisteringly fast data capture speeds by splitting the imaging process using multiple collectors and utilise all available ports
- Extract data in live or boot environments
- Recover deleted data
- Deploy without removing hard drives from target devices
- Rapidly extract RAM data
- Benefit from MD5, SHA1, and SHA256 validation
- Stop extractions before completion without losing data
- Present captured data as an E01, DD, or Ex01 image
- Enjoy greater mobility thanks to its portable and compact design

IMAGE 1TB IN LESS THAN 5 MINUTES

Use multiple collectors for unparalleled transfer speeds
(limited only by the number of ports available)
